www.mpc.org.my

The new PMI PMBOK® Guide 6 ed. bring a totally new level of sophistication to PM. PMI has taken into account current PM roles, align to the needs of today's and tomorrow project demands. PM roles have been expanded to evaluation and analysis activities prior to project initiation and follow-on activities after project closure related to realizing business benefits from the project. Such roles require new skill for PM in the area of data analytics.

In this workshop you will learn:

1. The new Project Management Models of PMBOK 6th
2. Data analytics skills to evaluate projects and measure business benefits
3. How to measure project performance during project Execution
4. How to forecast project performance in Monitoring and Controlling
5. Various methods to track Agile projects
6. Checklists and templates

Organized by:
