P2P TALENT DEVELOPMENT

our stories, milestones & journey with our collaborators

a bit about us

MPC Forum 2019
Design for Innovation

Our mission is to enable an ecosystem for our community to share knowledge, network opportunities and develop their career via:
1. professional certifications
2. conference and workshops for latest development in management and technology
3. business opportunities in projects and cross-border trades
4. high impacts community programs

P2P Talent Development focused on professional upskilling, industry 4.0 projects and developing community. Appointed as **Malaysia** representative and reseller for Asia Cross Border Link by a China government-supported e-commerce platform.

We also connect partners and project opportunities, taking a collaborative approach to leveraging on government I4 grants.

We are a platform for ideas sharing & innovations. We provide a forum for our clients to share ideas and collaborate on projects.

We are experienced in hosting webinars, and have been appointed to host the Nvidia Generative AI webinar series in year 2023.
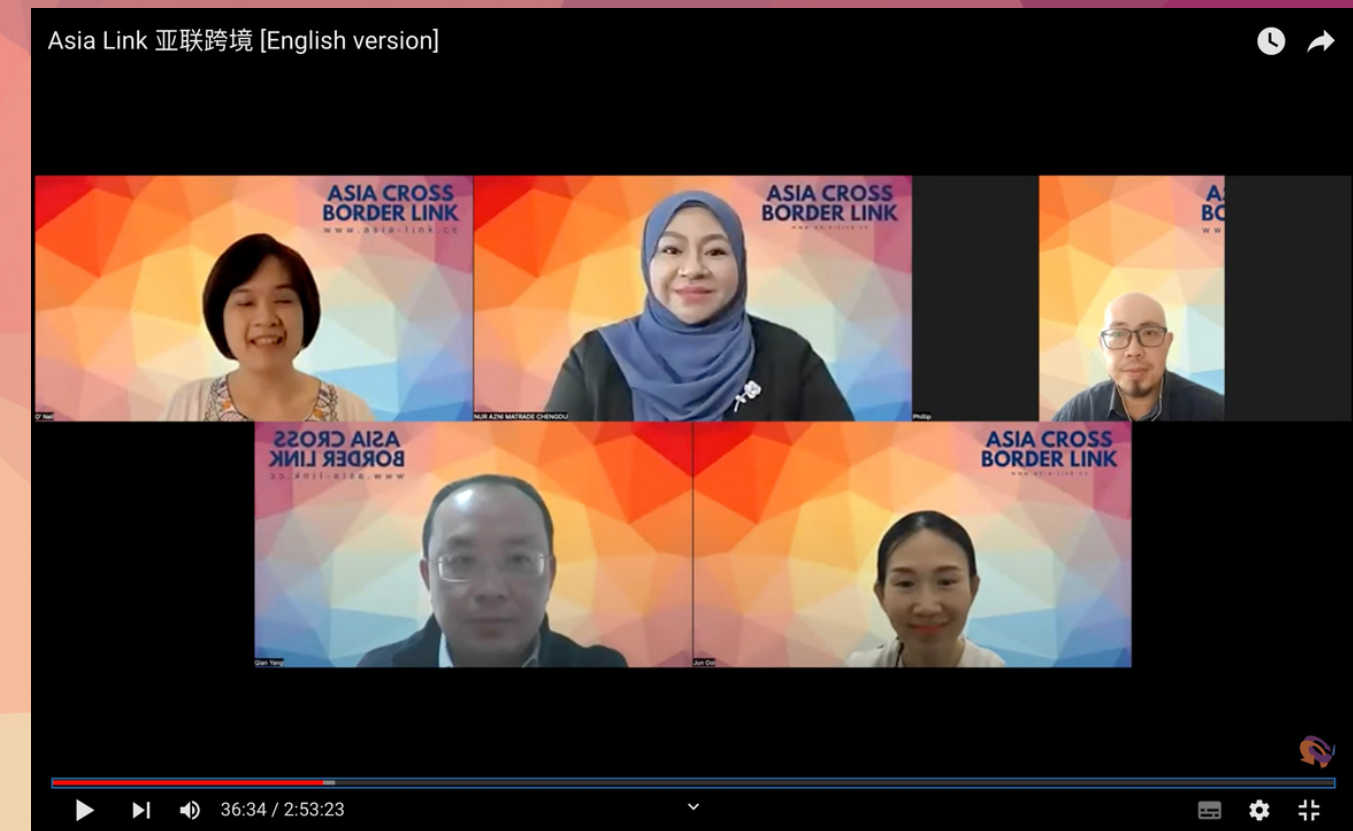

NEW INITIATIVES

A platform that offers comprehensive services to facilitate trade between Malaysia-based manufacturers and traders with importing countries, particularly for diverse range of products. Our services include:

- Onboarding
- Product Promotion
- Actual Plan Execution
- Actual Run

Our goal is to help Malaysia-based manufacturers and traders to export to countries outside of Malaysia, particularly China. By doing so, we create new business opportunities, promote economic growth, and build strong partnerships between Malaysia and other countries in the region.
